DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: Claim 1, line 5, "potion" should - - portion- -. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1, line 5, "having a bottom lips" is vague and indefinite. Applicant has a single lip on each end and not plural. Thus "lips" should be corrected to "lip".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (US patent no. 3,151,793). Smith discloses a holder inherently capable of being a condiment container holder comprising a plurality of walls (12 and 13) each walls having

Art Unit: 3632

a top lip (bend portion at top edge of wall 20, figure 4) on an upper portion thereof for retaining container (18), a bottom (11, figure 2) engaged to plurality of walls, the bottom having a bottom lip (16 and 17) on each end portion thereof and the bottom having a condiment well (26) formed therein inherently capable of receiving liquid condiment.

Applicant's recitation to the liquid condiment is of intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US patent no. 3,151,793) in view of Feerick (US patent no. 2,491,652). Smith disclosed all the claimed features of applicant's invention except for a condiment container. Feerick teaches a holder supporting condiment containers (15). It would have been

Art Unit: 3632

obvious to one of ordinary skill in the art to place condiment containers into the holder of Smith for holding condiments as taught to be desirably by Surber.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US patent no. 3,151,793) in view of Grondin (US patent no. 3,168,275). Smith disclosed all the claimed features of applicant's invention except for using adhesive material for mounting to engage the bottom or wall. Smith uses fasteners to mount the holder. However, to substitute mounting fasteners with adhesives are notoriously old and well-known. Such modification has the known advantage of eliminating damage to a wall surface to which the holder is to be mounted. Grondin teaches a holder with walls (20) with lips (24) and bottom (18) engage the walls wherein releasable adhesive material (30, figure 2, 32, figure 3) can engage the bottom (18, figure 2) or the wall (20, figure 3) to alternatively mount the holder under different conditions. It would have been obvious to one of ordinary skilled in the art to substitute the mounting fasteners of Smith with releasable adhesive as taught by Grondin to prevent damage to a wall surface and to provide the adhesive material at either the bottom or wall as taught by Grondin to facilitate alternative mounting under different orientation.

Conclusion

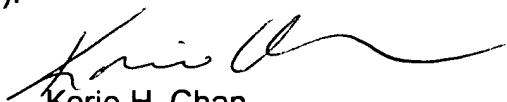

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The remaining cited prior art of record demonstrate holder with walls connected by a bottom.
